

PRESERVATION OF TOMB OF JAN BABA, WHS MAKLI

Post 1ST EXPERTS' COMMITTEE MEETING

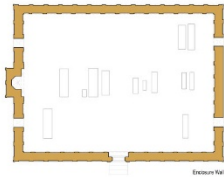

Folio XIII – Chronological Classification

WORK-IN-PROGRESS (SEPTEMBER 2015)

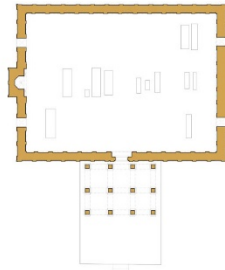

Chronological Classification Into Four Significant Periods

Tomb of Jan Baba can be divided into following four chronological periods based on significant development over its history as evident from available photographic evidence.

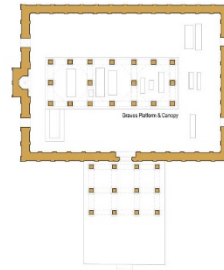

Plan Period A

Period-A:
Original basic design
of the monument.

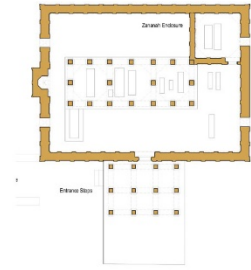

Plan Period B

Period-B:
Estimated first ad-
dition was entrance
colonnade and can-
opy.

Plan Period C

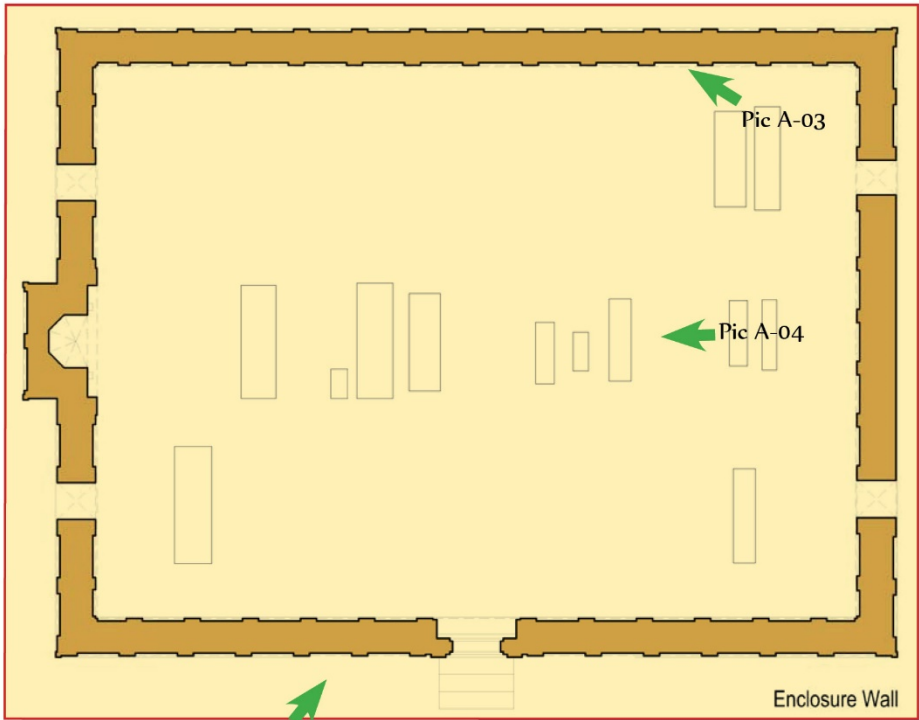

Period-C:
Entrance colonnade
design was replicated
at grave canopy with
addition of three
domes.

Plan Period D

Period-D:
Another grave at the
front with its own
platform was added.

Pic A-01

PERIOD A - DETAILS

A-01: Historic Aerial view, Steps are visible at the Front

A-02: Conflicting & Overlapping Elements suggest that front colonnades & canopy were added as a later development

Summary of Chronological Classifications:

Presented photographic evidences are significant proof that:

- 1- Entrance Platform and Colonnade Canopy above it was not part of the Original Structure.
- 2- Interior Graves Platform with Colonnades and Conopy above with three domes were also a later addition.
- 3- Zananah (Female) Grave Enclosure walls were added later in the history of this monument.
- 4- Even entrance step were relocated from south to west side to connect this monument with adjacent Isa Khan Tarkhan's Tomb.

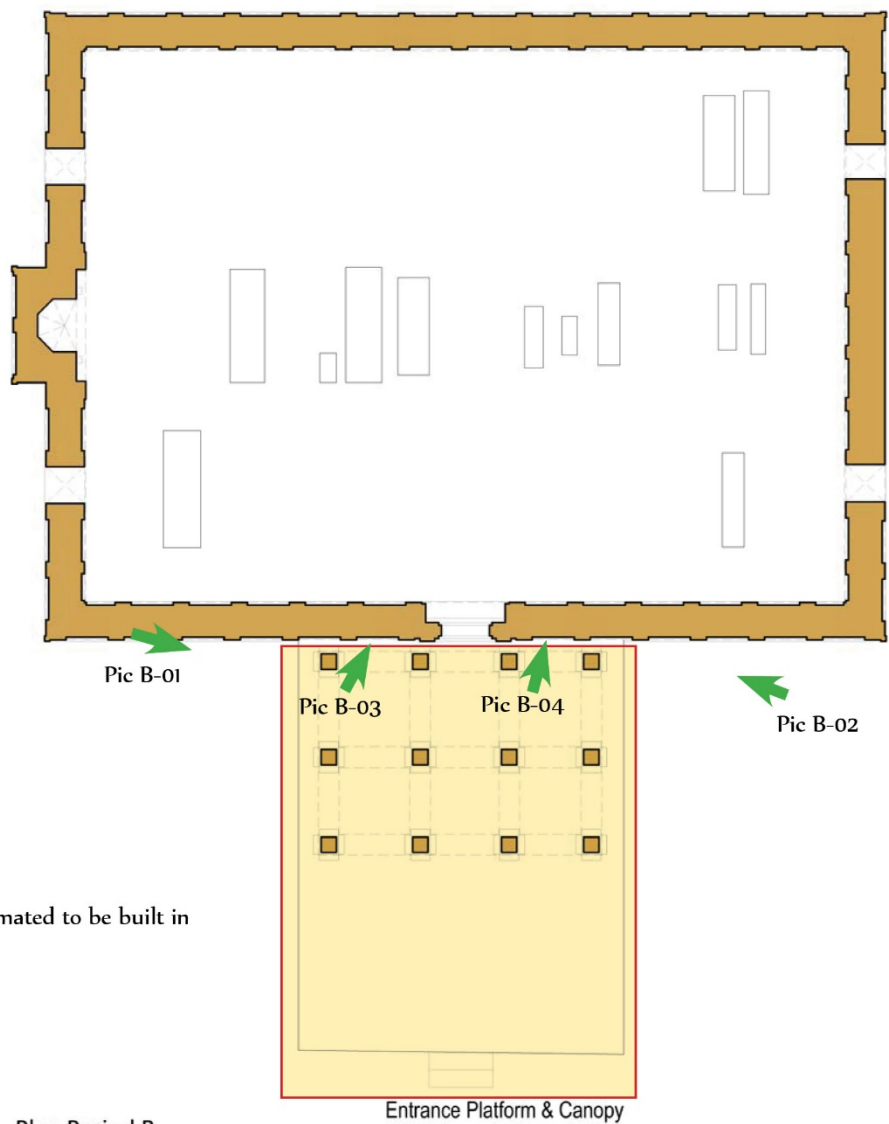

A-03: Discontinuity of both walls at the corner joint implies that one of the Zananah enclosure wall was a later addition.

A-04: Row of columns placed exactly in the middle - blocking western mihrab views - conflict with over all symmetrical design, suggests later addition

PERIOD B - LAYOUT

 Area / Section estimated to be built in this period

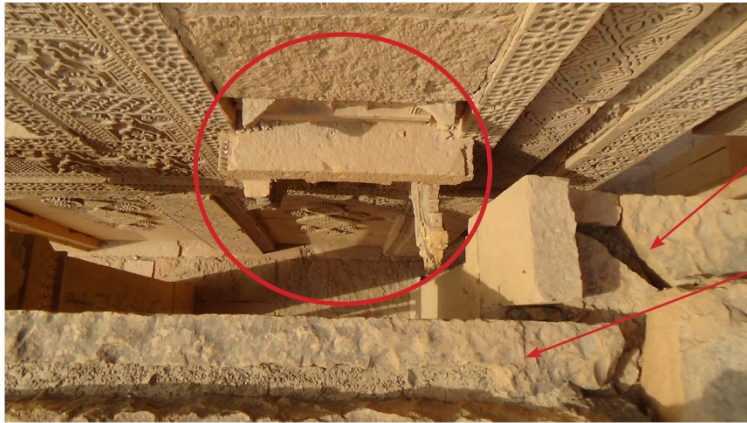

Plan Period B

Folio: CHRONOLOGICAL CLASSIFICATION			
Building: General			
Title: Plan Period B			
 HERITAGE FOUNDATION OF PAKISTAN			
Scale: 1:125	N 	Date: Sep. 15	
Folio CC	Category L	Element (2-)	Number 002B

PERIOD B - DETAILS

B-01: Canopy beam is deliberately placed away from the capital of the column to provide gap for projected decorative elements on front wall.

Location of the central segment beam.

Left segment beam was put out of place to accommodate wall motifs

B-03: Evident here are adjustment done in canopy beams due to projected decorative elements of the front wall suggest that front canopy was added at later period.

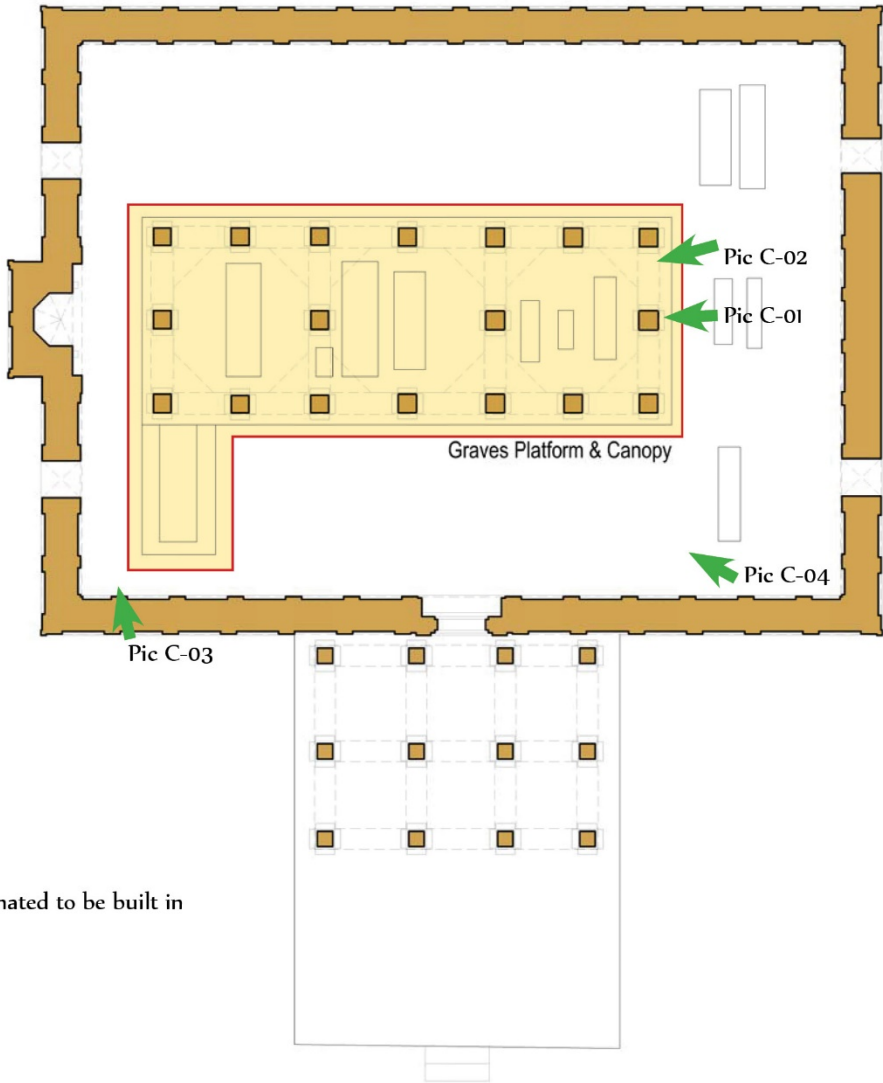

B-02: Prominent vertical separation and horizontal course mismatch suggest that platform was added at a later time.

B-04: Stark absence of both design continuity and visual connection between two adjacent elements suggests that Entrance canopy was not part of the initial design.

PERIOD C - LAYOUT

Area / Section estimated to be built in this period

Plan Period C

Notes: --

Project: JAN BABA TOMB			
Folio: CHRONOLOGICAL CLASSIFICATION			
Building: General			
Title: Plan Period C			
 HERITAGE FOUNDATION OF PAKISTAN			
Scale: 1:125	N 	Date: Sep. 15	
Folio CC	Category L	Element (2-)	Number 002C

PERIOD C - DETAILS

Column in the Symmetrical center line.

C-01: Row of columns placed exactly in the middle - blocking western mihrab views - conflict with over all symetrical design, implies them to be a later addition

C-03: Canopy is placed too close to the Qibla Mihrab wall.

Random distribution of graves between coulumn.

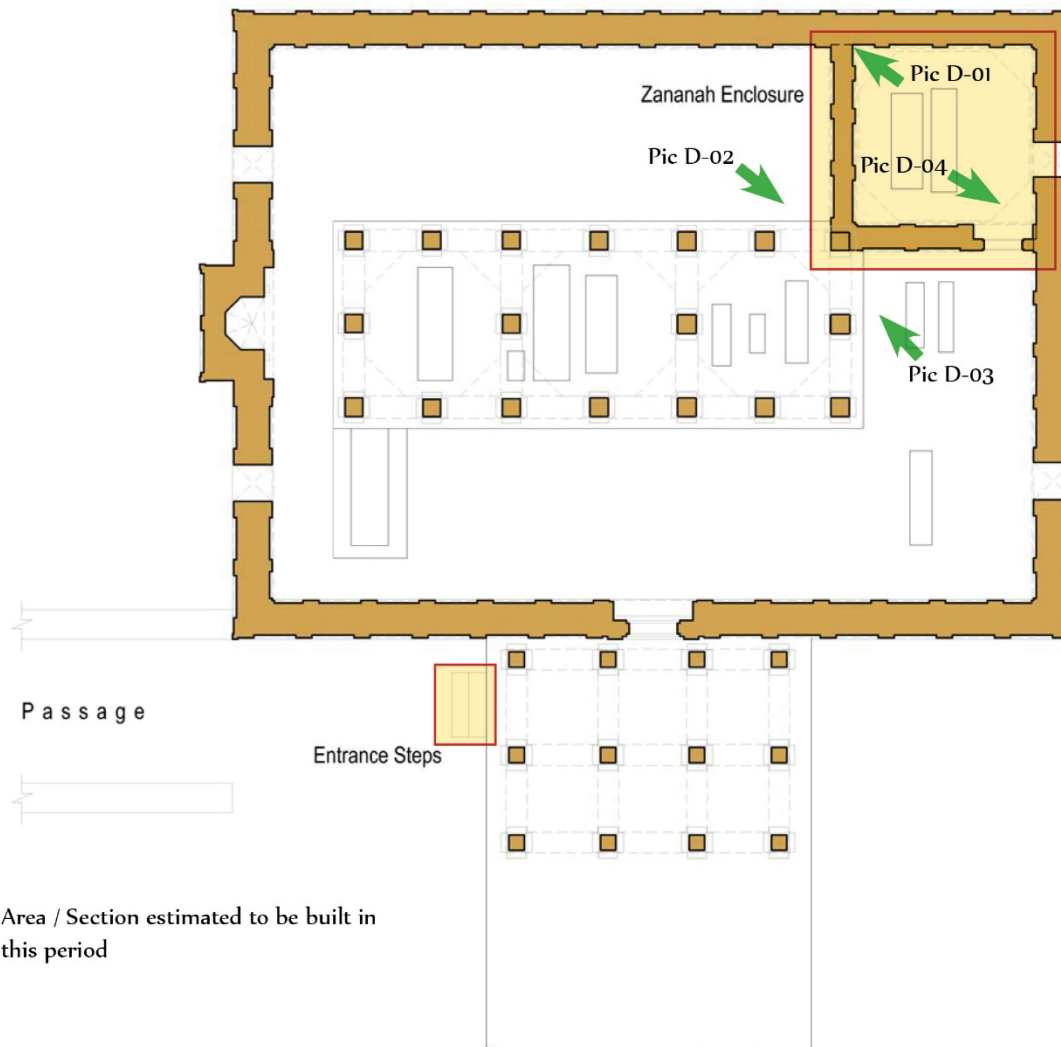

C-02: Placement of columns amid random distribution of graves in between indicate that canopy was added after a while.

C-04: Canopy structure both visually and physically obstruct western Mihrab that suggest it was added in a later period.

PERIOD D - LAYOUT

Plan Period D

Scale: 1:125		N 	Date: Sep. 15
Folio CC	Category L	Element (2-)	Number 002D

PERIOD D - DETAILS

D-01: Discountinuity of both walls at the corner joint implies that one of the Zananah enclosure wall was a later addition.

D-02: Platform column is embedded at the corner of the wall implies that these walls were built after the platform.

D-03: Corner of platform merged in walls and difference in motifs suggests difference in time period of both structures.

D-04: Wall motifs are blocked due to Entrance way vertical support stone element that was clearly a later addition.
